

ChefMate: Quick Recipe Assistant

Team Member:

- 1) K Sanjana Shetty - 4NM21CS074
- 2) Keerthana - 4NM21CS078

Abstract:

The recipe app aims to provide users with a convenient and user-friendly platform for accessing a variety of recipes. Users can search for recipes by dish name and receive detailed instructions, ingredient lists and calorie values for their selected dishes. The app aims to streamline the cooking process for users by offering guidance and information, making it easier for them to prepare delicious meals at home.

Objectives:

- 1) Develop a user-friendly interface for the recipe app that allows users to easily search for recipes by dish name.
- 2) Integrate a search functionality that efficiently retrieves relevant recipes based on user queries.
- 3) Provide detailed recipe instructions, including step-by-step guidance on cooking methods and techniques.
- 4) Include nutritional information such as calorie values for each recipe to help users make informed dietary choices.

Outcome:

The recipe app revolutionizes home cooking by offering a user-friendly interface for easy recipe searching and retrieval. With detailed instructions and nutritional information provided, users can confidently prepare delicious meals while making informed dietary choices. Seamlessly integrating search functionality, the app enhances the cooking experience, making it convenient and enjoyable for users of all levels.
